Overview

Qualtek delivers end-to-end, vertically integrated manufacturing for power conversion and interconnect products. Our Cambodia facility supports scalable OEM/ODM programs from tooling and injection molding to SMT/AI and transformers.

Vertical Integration

- Tooling design & creation
- Magnetics production
- Stamping
- Cable extrusion lines
- Plastic injection
- SMD/SMT & auto-insertion (AI)
- Reliability & verification testing
- R&D

Certifications & audits

- ISO 9001
- ISO 14000
- IECQ QC 080000
- Sony Green Partner (GP)

Manufacturing Capabilities

We design, develop, and manufacture a broad portfolio of power conversion products all in-house, including:

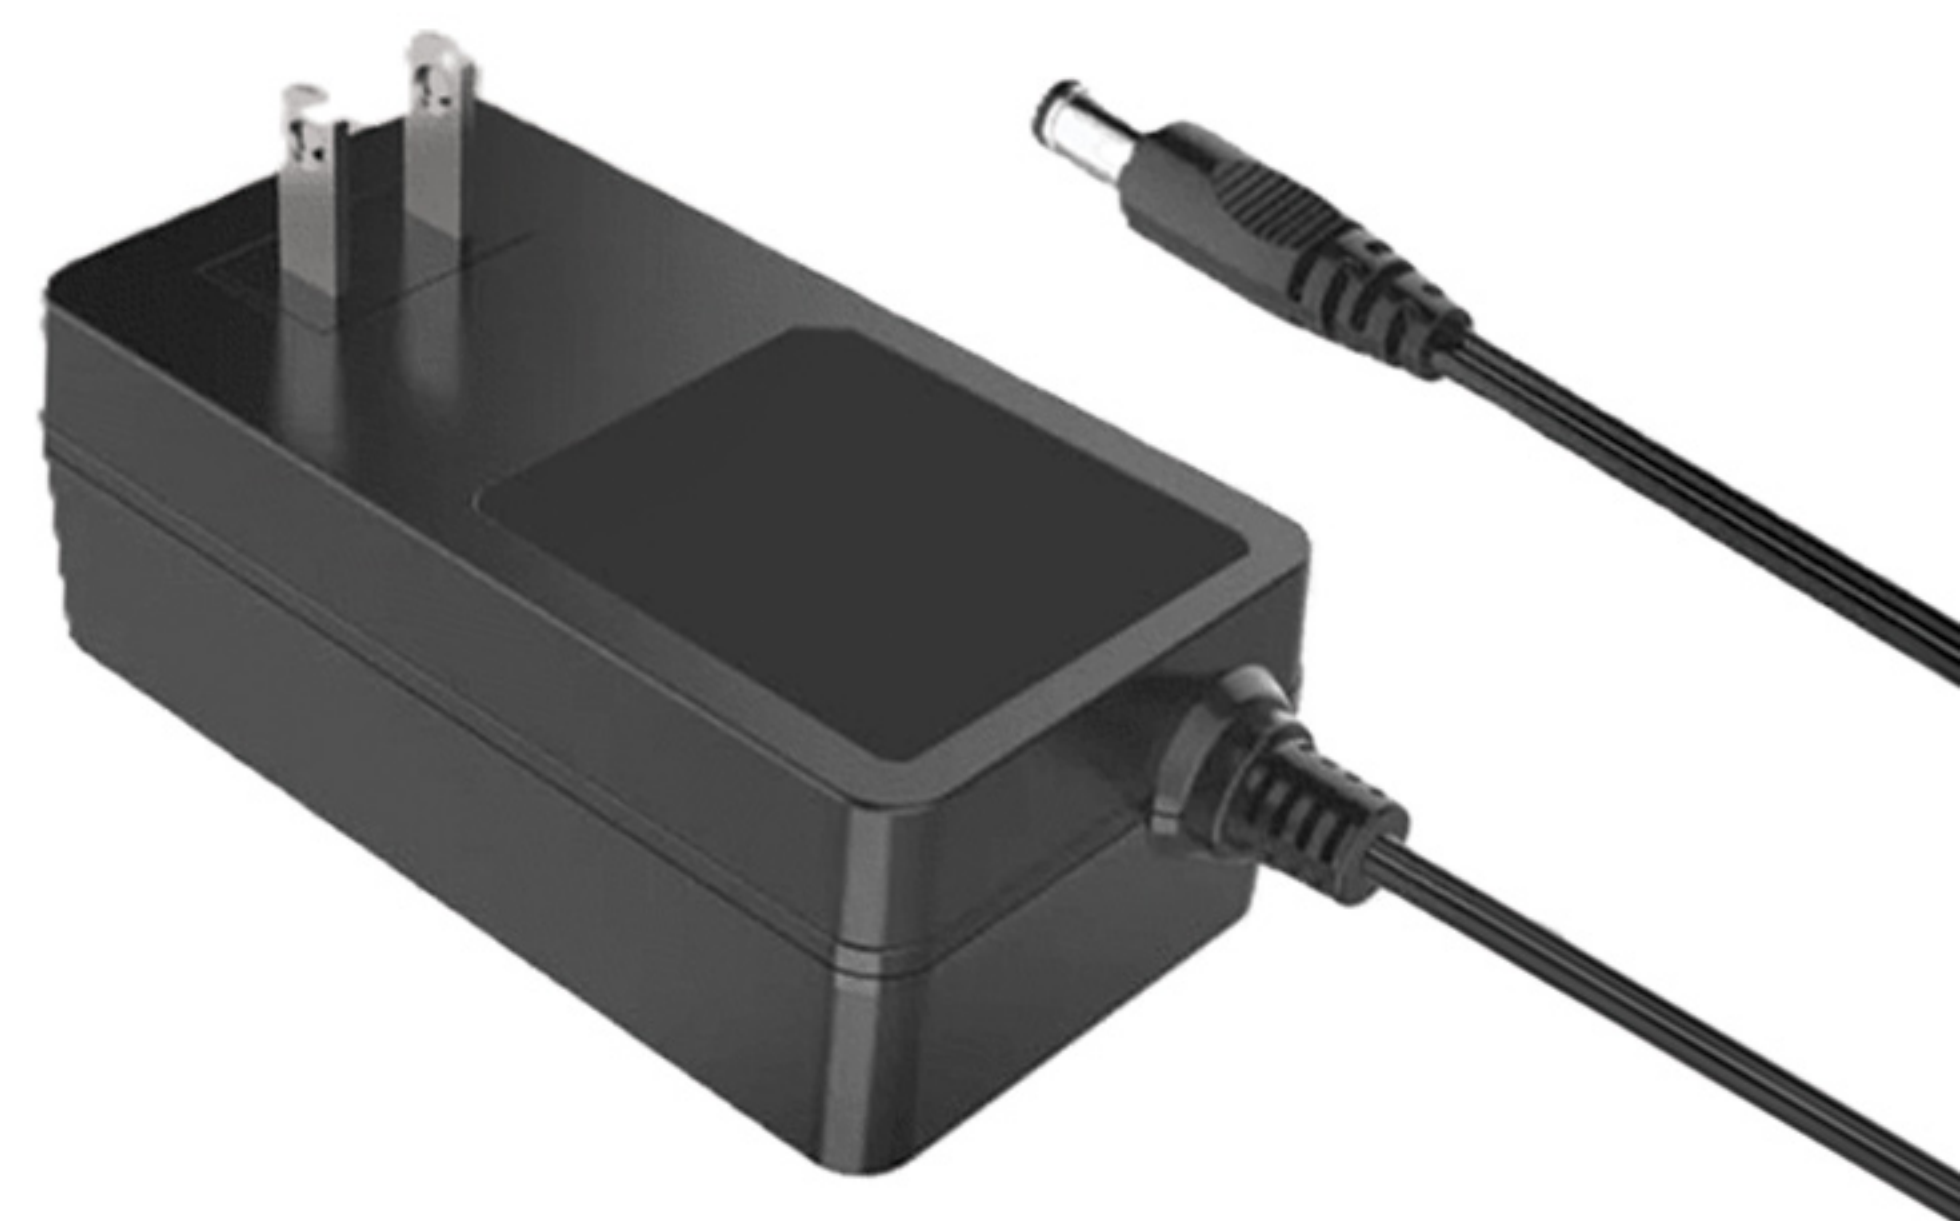

- Switching Power Supplies – Efficient and compact solutions
- Adapters & Chargers – For consumer, medical, and industrial
- Open-Frame & Modular Supplies – Flexible form-factor designs
- Custom Power Solutions – Tailored for specific application needs

Product Lines & End Markets

- **Consumer:** QC/PD chargers, power cables, laptop chargers, power boards for A/V products
- **Information Technology:** power adapters & payment systems
- **Battery Chargers:** power tools, household appliances, personal care and micro-mobility
- **Medical & Measurement:** standard and customized solutions
- **Industrial:** commercial coffee machines & revolving doors
- **LED:** customized drivers and module assembly

Tooling Center Highlights

- Ultrasonic mold polishing
- EDM (electrical discharge machining)
- Precision wire cutting
- Laser mold welding
- Precision surface grinding
- Milling

Capabilities summary: 12 SMT lines, 10 AI lines, 33 transformer lines, 29 cable extrusion lines, and 68 plastic injection lines.
